LESSON TITLE: Vocab Riddles

GRADE: Fifth

OBJECTIVE: Students will use Keynote to create vocabulary word riddles.

CURRICULUM CONNECTION: Dependent upon curriculum area.

MATERIALS: Keynote, computer, printer, SmartBoard if available to demonstrate

PROCEDURE: (Read to students)

Today we're going to use Keynote to create a two-slide Keynote riddle presentation using your vocabulary words.

1. Find the Keynote icon on your Dock. Click it one time.
2. Select a theme for your presentation and click the Choose button.
3. Change your first slide to a bulleted list. Click on the button for Masters (located on the toolbar). Select bullets.
4. Double click your mouse in the text area and write one clue about your vocabulary word. The clue should help your reader understand the meaning of the vocabulary word, but it shouldn't tell them what it is.
5. After you have typed your first clue hit the return key on your keyboard and type another clue.
6. Include a total of 3-4 clues.
7. The final bullet on your slide should say, "What am I?"
8. Insert a new slide by clicking the New button on your toolbar.
9. Change the slide layout to Title & Bullets.
10. In the title area type, "I Am"
11. In the bullets area type your vocabulary word.
12. Go back to your first slide. Click one time on your text to select it (look for handles around the corners, if you see them then you selected the text box).
13. Add entry builds for each clue.
14. Click on the Inspector button on your toolbar.
15. Select the build inspector (third button)
16. Click the build in button
17. Click the effects button.
18. Click the effect you wish to use for your entry build.
19. Set the delivery to be by build, that will allow each clue to enter the slide separately.
20. Click the more options button. Make sure that builds are set to enter on click.
21. Go to slide two. Set an entry build for your answer, make sure it enters on click.
22. Do not add a transition for this show, the slides will be combined into one class show.
23. Save the slides to the folder _____ in your fifth grade share folder.

Additional Teacher Directions

After students have completed their slides you need to assemble them into one class presentation.

1. Create a new Keynote slideshow. Type whatever you want for the title slide.
2. Click on the View button, located on the toolbar.
3. Select Light Table.
4. Now open the folder on the Shares where the students saved their presentations.
5. Open the first presentation.
6. Change the view to the light table.
7. Draw a box around the two slides. They should be highlighted/outlined in yellow.
8. Now drag those slides to your presentation. (Click on one slide, hold down your mouse button, don't lift up, and drag)
9. Save your changes
10. Close out the student presentation and open up the next student presentation, repeating the process.
11. After all student slides have been added to the presentation add a transition effect to all slides.
12. Save the presentation one final time.

EVALUATION: Teacher observation or teacher created rubric.

EXTENSION: Students add a third slide, with the vocab word used in a sentence.

EXAMPLE:
